PROFESSIONAL SUMMARY

Machine Learning Engineer with 3+ years of experience specializing in Generative AI, RAG pipelines, and agentic systems. Expertise in building production-grade ML services with FastAPI, LLM tooling, and modern vector databases. Proficient in end-to-end ML lifecycle including model development, deployment, and observability. Strong background in computer vision, NLP, and data infrastructure.

PROFESSIONAL EXPERIENCE

Machine Learning Engineer

Culinda Inc — Hyderabad, India | November 2022 – Present

- Built a scalable RAG-enabled agentic chatbot for dynamic Q&A; across dashboard elements, improving user engagement and reducing support tickets
- Integrated agentic frameworks and LLMs for cybersecurity decision support, enabling automated threat analysis and response recommendations
- Core contributor to Culinda's flagship SaaS products CARM and Darkeye; shipped custom features, resolved production issues, and mentored interns
- Designed and developed Dark Watch, a threat remediation module that automates security vulnerability identification and remediation workflows
- Implemented observability pipelines using LangFuse for monitoring LLM performance and debugging RAG systems in production

Data Visualization Intern

Indio Networks — Pune, India | April 2022 – July 2022

- Built interactive Plotly dashboards for real-time monitoring of connected IoT devices and network traffic
- Developed FastAPI backend services integrated with Dash for data visualization and analytics
- Maintained and enhanced predictive models for network anomaly detection

KEY PROJECTS

Darkwatch — AI Risk Remediation System

- Built enterprise RAG pipeline using Python, FastAPI, Weaviate/Qdrant, LlamaIndex, and OpenAI for automated security threat remediation
- Implemented document ingestion, vector storage, and LLM-guided remediation with LangFuse observability and Docker deployment

NightHawk — Conversational Database Intelligence

- Developed natural language analytics platform using PostgreSQL, OpenAI Agents SDK with dynamic routing between MongoDB and SQL backends
- Implemented streaming responses with inline visualizations for real-time data exploration

Academic RAG Chatbot

- Created voice + text academic assistant using React, FastAPI, LlamaIndex, Llama-3.2-70B, and Cohere embeddings for university Q&A;

TECHNICAL SKILLS

Languages: Python, SQL

ML/AI: PyTorch, Deep Learning, Generative AI, RAG Systems, LLM Fine-tuning, Computer Vision, NLP

Frameworks: FastAPI, Flask, LlamaIndex, LangChain, OpenAI SDK, Streamlit, Gradio

Databases: PostgreSQL, MySQL, MongoDB, Supabase, Weaviate, Qdrant (Vector DBs)

Tools & Infrastructure: Docker, Git, GitHub/GitLab, Jira, LangFuse, Weights & Biases

Data Visualization: Plotly, Dash, Pandas, NumPy

EDUCATION

Bachelor of Engineering in Computer Science

University of Mumbai | 2019 – 2023 | CGPA: 8.89/10

CERTIFICATIONS

- AWS Certified Machine Learning – Specialty
- AWS Machine Learning Nanodegree
- Oxford Machine Learning Summer School (Graduate)
- AI Agents Fundamentals

ACHIEVEMENTS & COMMUNITY

- Featured Speaker: Kaggle Experts – Notebooks & Discussion Workshop (April 2023)
- Top Community Contributor: Plotly Community Forum (October 2022)
- Active Hackathon Participant: Multiple AI hackathon awards via LabLab.ai
- Open Source: 100+ GitHub followers, 77+ stars across 108 repositories
- Published Models: Hugging Face models for text classification including fine-tuned DistilBERT
